- 2:00 – Tour @ NCAR**
- 3:00 – Bus departs for return trip**
- 5:00 – Arrive at meet-up location in Thornton**

Join us for a tour of the NSF NCAR-Wyoming Supercomputing Center. This tour will highlight this world class data center which serves as the supercomputing hub for NCAR's atmospheric research. "Derecho" is a 19.8 petaFLOPS HPE Cray supercomputer housed in the Cheyenne, Wyoming data center and provides insights to earth sciences modeling, climate, and weather. The tour will include a 45-minute facility tour and some time to explore the exhibits in the Visitor Center and learn more about the NCAR contributions to the scientific community.

**Please sign up only if you intend to go as space is limited**

*More Information to be provided to those who register!*
