Agenda

3:00pm - Doors Open/Networking

3:30pm - Introductions/Chapter Updates

3:45pm - The State of Data Center Legislation

4:00pm - Stories and Panel Discussion

5:00pm - Q&A/Program Close

5:15pm - 6:00pm - Networking & Raffle

Join us on the spacious open-air rooftop sundeck at the Denver Athletic Club for our first in-person event in over a year!

We are looking forward to an exciting program with an opening presentation on Data Center Legislation from Matt Wendell of the Colorado Tech Association. We will then hear stories and discussion from our esteemed panel members, all with different backgrounds and perspectives, on "all things fire" in the Data Center environment. Gary New, a former firefighter with the Wheat Ridge Volunteer Fire Department turned Operations Manager at the NCAR-Wyoming Supercomputing Center, will be moderating.

In this unprecedented year, we would like to thank all our members and sponsors for your continued support. We are excited to see your smiling faces again, even if behind a mask!

Registration will be limited, so ensure your spot today! Networking opportunities, light fare, and drinks provided.

Parking at the Denver Athletic Club is also complimentary from 7X24 RMC!
